

CVWO2020 mid-assignment
Toh Zhen Yu, Nicholas
A0201406Y

Schema:

Intended Features:

User login system (using Devise)

Search by entry content and tags

Filter by tags

Mark entry as done without deleting (separate option to delete permanently with confirmation pop-up)

Typescript

Hosting

Managed to host the tutorial blog app on Heroku.

Difficulties:

Debugging installation (WSL) is very difficult especially without having any experience other than cs1101s.

Some console errors aren't helpful, eg <https://github.com/tiuweehan/CVWO-2020/issues/7>, fix is not intuitive from the error messages

Devise routing
