CVWO2020 mid-assignment
Toh Zhen Yu, Nicholas
A0201406Y

Schema:

User	Entry	Tag
User_id	**Entry_id**	**Tag_id**
Email	Content	Content
Name	Due date	**Entry_id** (FK)
Password	Completed	
	User_id (FK)	
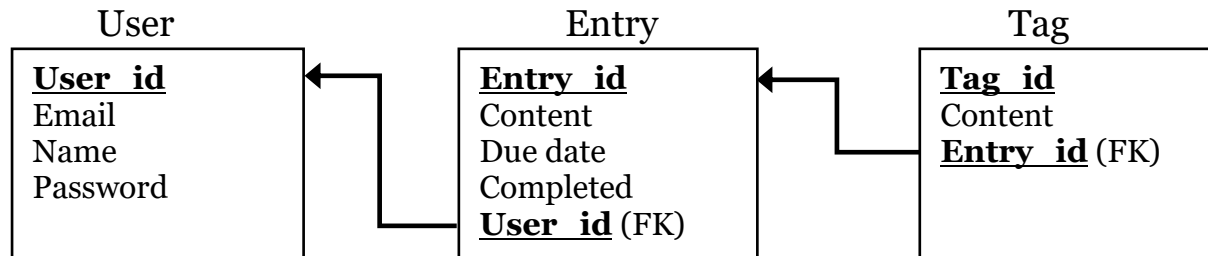

Intended Features:
User login system (using Devise)
Search by entry content and tags
Filter by tags
Mark entry as done without deleting (separate option to delete permanently with
	confirmation pop-up)
Typescript
Hosting

Managed to host the tutorial blog app on Heroku.

Difficulties:

Debugging installation (WSL) is very difficult especially without having any
experience other than cs1101s.

Some console errors aren't helpful, eg https://github.com/tiuweehan/CVWO-2020/issues/7, fix is not intuitive from the error messages

Having difficulty setting the root page to be the sign-in page (devise)
